Rutgers University-Camden
Digital Teaching Fellows 2019

Program overview

The Digital Teaching Fellows program engages a small group of faculty members at Rutgers UniversityCamden in an exploration of instructional technologies to promote dynamic student learning in traditional classroom settings, as well as in hybrid and online courses.

Two full-day workshops were conducted on May 29th and 30th. Special thanks to past Fellows Silvia Perez-Cortes (FAS), Gail Caputo (FAS) and Wanda Williams (SNC), as well as our colleagues from OIT for their valued participation.

Feedback from faculty Fellows

"Excellent fellowship!! Learned so much... thank you for sharing your expertise and helping us be better at what we love to do."

"I found this fellowship to be engaging! I am walking away with a variety of tools to use in the classroom and online to create an engaging learning experience for the students."

"The FlipGrid and Wakelet sessions both provided these kind of "aha moments" where I saw significant opportunity for using these tools in a traditional classroom setting."

Future directions

Fellows will present their redesigned courses and teaching reflections to their cohort on 10/18 and 2/9. Deans, department chairs, and past Fellows will be invited to join us at these fun, informative and collegial sessions.

The numbers at a glance

15

faculty Fellows from FAS, SBC, SNC and Law

12

workshop sessions on topics including: Active Learning, Video creation with Kaltura, VoiceThread and Recording classroom lectures

100

percent of session attendees rated the sessions on Student polling and Creating content with Adobe Spark as **very valuable** or **valuable**
